iWave-R Air Ionization Systems

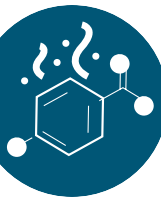

iWave®-R 4900-20

Targets
Particles

Reduces
Certain Viruses
& Bacteria

Tackles
Odors

Reduces
VOCs

DESCRIPTION

Since the CDC has stated that COVID-19 can spread via airborne transmission, several businesses have invested in new technology to clean indoor air. To make the air fresher for customers, E Salon in Goleta, CA, searched for a way to clean the air at the business.

SOLUTION

Elini Tziouvaras, owner of the salon, initially looked at using ultraviolet lights to clean the air in the salon, but ended up choosing the iWave Air Ionization System due to its maintenance-free bi-polar ionization. "People come in and they notice it right away," she said. "It just smells cleaner." The iWave system has given her more peace of mind: "It makes me feel really good because I feel like there's fresher air inside. So people don't feel nervous about coming inside the salon."
