BUSINESS:
NOCO Energy Corporation

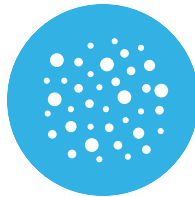

LOCATION:
Tonawanda, New York

iWAVE UNITS:
iWave-R Air Ionization Systems

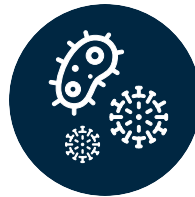

iWave®-R 4900-20

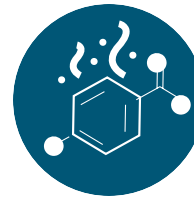

Targets
Particles

Reduces
Certain Viruses
& Bacteria

Tackles
Odors

Reduces
VOCS

DESCRIPTION

The State of New York considers devices capable of reducing SARS-Cov-2, the virus that causes Covid-19, and other pathogens so essential that they are offering incentives for companies that install that kind of equipment. NOCO Energy has installed iWave devices in a number of businesses – including their own offices.

SOLUTION

NOCO Energy bought the iWave for cleaning the air in its own offices in the Town of Tonawanda, and the air quality has improved. "It's essential for businesses where people spend more time inside an office," said Tom Wrate of NOCO. He also likes iWave's effectiveness at reducing particles. "The ions attach to dust particles or whatever is in the air. This helps keep that down in buildings, so you don't have those issues in offices."
