iWAVE UNITS:
iWave-R Air Ionization Systems

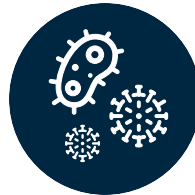

iWave®-R 4900-20

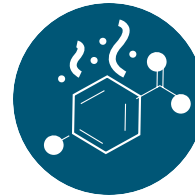

Targets
Particles

Reduces
Certain Viruses
& Bacteria

Tackles
Odors

Reduces
VOCS

DESCRIPTION

Mater Dei Catholic High School in Evansville, IN, was looking for a device to install to improve their indoor air quality. In order for the school to reopen, administrators searched for ways to mitigate the spread of the virus.

SOLUTION

An iWave-R Air Ionization System was installed in the school's HVAC system for immediate and long-term benefits to students and staff. "I know there have been some other schools that have installed similar systems with good results," said Andy Morris, president of the high school. In addition to increasing precautions against SARS-CoV-2, the virus that causes COVID-19, the iWave air device will also reduce certain bacteria and viruses.
