**INSTITUTION:**  
Jefferson School City Center

**LOCATION:**  
Charlottesville, Virginia

**iWAVE UNITS:**  
58 iWave Air Ionization Systems

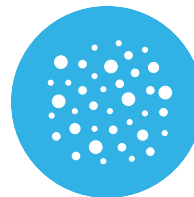

iWave®-C 4900-10

iWave®-R 4900-20

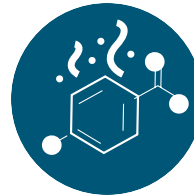

Targets  
Particles

Reduces  
Certain Viruses  
& Bacteria

Tackles  
Odors

Reduces  
VOCS

## DESCRIPTION

The Jefferson School Foundation Board of Directors wanted to improve air quality at the Jefferson School City Center for all students, faculty and visitors. This was recommended by Colliers International, the foundation's property management company.

## SOLUTION

The school installed iWave bi-polar ionizers in all 58 air handling units at the center to address air circulation and quality. They also adjusted the center's HVAC running schedules to allow for longer runtimes. "We want tenant staff and patrons, and all guests in the building, to feel they can visit the Jefferson School City Center now and in the future and have cleaner fresher air," said Martin V. Burks III, chairman of the Jefferson School Foundation Board of Directors.
